

## *regarding tower*

Conceived as an object in the landscape and a vocal chord to be animated by a series of commissioned projects, the 80 foot concrete tower contains a double helical staircase that ascends and descends from opposite sides of the tower to spatially suspend the audience and performer in an alternative to a traditional face to face performance. Other artists who have performed in the tower include choreographer Joe Goode, The Kronos Quartet, Shahrokh Yadegari and The Pacific Mozart Ensemble.

## *regarding appreciation*

Contractor: Oliver & Company

Architects: Jensen Architects / Jensen & Macy Architects

Structural Engineer: Citta

Civil Engineer: Atterbury & Associates

Geotechnical: Bauer Associates

Surveyor: Crabtree Land Surveying
